OPEN SOURCE CONTRIBUTIONS

A more complete record of my contributions is available on GitHub.

fiasco 2017-present

MAINTAINER github.com/wtbarnes/fiasco

fiasco provides a modern Python interface to the CHIANTI atomic database in addition to implementing many atomic physics calculations commonly used in solar physics. I am the creator and primary maintainer of fiasco.

SunPy 2016-present

CONTRIBUTOR github.com/sunpy/sunpy

SunPy is a library for solar data analysis in Python. I am an active member of the SunPy community and have made several contributions to the package. Specifically, I have worked to implement the widely-used AIA temperature response functions in SunPy.

ChiantiPy 2016-2017

CONTRIBUTOR github.com/chianti-atomic/ChiantiPy

ChiantiPy is a Python interface to CHIANTI atomic database. My main contributions to ChiantiPy have been improving the documentation and packaging infrastructure and adding a test suite.
